Full Stack Web Developer with background as Mechanical Engineer and a unique technical background looking to create new and exciting websites and applications. Earned a certificate in Full Stack Web Development from the University of Connecticut Coding Boot Camp. Diligent, fast learning problem-solver that is motivated and excited about creating web applications and continuing to learn in this fast growing industry. Team player with a focus on meeting project deadlines quickly and effectively.

TECHNICAL SKILLS

Front End: React, HTML, CSS, JavaScript, jQuery, Tailwind, Handlebars

Back End: Node.js, Express.js, MySQL, NoSQL

Other: Git, OOP, Responsive Design, MVC Paradigm, Agile Methodology

PROJECTS

RentAFit - University of Connecticut Coding Bootcamp

<https://github.com/chris-15/Rent-A-Fit> | <https://afternoon-forest-49656.herokuapp.com/>

- Created a MERN stack single page application where users can post clothing items that they would like other people to rent or search for items that they would like to rent themselves.
- Collaborated with two other team members while practicing Agile processes.
- Technologies used to create the application include: Node.js, Express.js, React, GraphQL.

All-Star Profiles - University of Connecticut Coding Bootcamp

<https://github.com/chris-15/All-Star-Profiles> | <https://infinite-taiga-75694.herokuapp.com/>

- Created a web application where athletes can post their sports highlights in hopes of gaining attention of college coaches for recruitment.
- Collaborated with two other team members while practicing Agile processes.
- Technologies used to create the application include: Node.js, Express.js, MySQL, Sequelize, and Handlebars.

WORK EXPERIENCE

Cyient

East Hartford, CT

Project Engineer

September 2017-Present

- Assisted with Bill of Material (BOM) management tasks of airplane engines including release of concept BOM, building BOM structure and creation of Concept Items within Teamcenter.
- Reviewed engineering changes and aligned Bill of Material attributes to production intent structure as required.
- Drafted over 100 different Development Engineering Changes (DECX) to release Initial Development Bills of Materials.
- Created over 25 complex airplane engine part drawings for Externals hardware based on input from Pratt & Whitney Externals Product Definition team.
- Created over 1000 concept, development, and production part numbers in Teamcenter and assigned attributes per Pratt & Whitney Nomenclature ESW in order to meet customer requests.
- Responsible for creating and submitting weekly reports of work done and hours charged by a 15 person team to customers.

OTHER WORK EXPERIENCE

Webster Bank

Bloomfield, CT

Associate Universal Banker

November 2016-September 2017

- Utilized sales techniques to uncover customer needs and match to the bank's products and services.
- Accurately and efficiently processed routine banking transactions while balancing a cash drawer and servicing customer requests.
- Part of a team responsible for meeting monthly sales deadlines as well as individual sales deadlines.
